Class Hours:

Start Time: 10:00 a.m.

End Time: 6:00 p.m.

About the Instructor:

Frank DeYoung has been a paramedic for over 10 years, beginning his foray into emergency medicine as an EMT in Lewis County, Washington quickly choosing to pursue paramedic training, and he now works full time as paramedic/firefighter for a community north of Seattle.

After 9-11-01, he joined the Navy Reserves, going in as a Corpsman, but eventually deploying as a tactical craft coxswain. An avid shooter and hunter, Frank is also involved in teaching for several firearms training schools. Frank is also a highly sought after law enforcement trainer, travelling across the country to offer various courses for police departments.

Pre-requisites:

There are no classroom or skill prerequisites for this class.

All Norpoint Training Center courses require that the student be at least 18 years of age, have a clean criminal history and not otherwise be prohibited from the possession of firearms.

Saving lives doesn't always involve a gun.

Here at Threat Anatomy many students have asked for training in physically surviving the immediate aftermath of a deadly force attack.

What can be done to staunch life-threatening blood loss and similar injuries after you have stopped the attack against you or against a loved one or companion?

Or better yet how about everyday life at home or on the road when a life threatening injury can occur. Are you ready?

This one-day class will cover

many aspects of First Aid as specifically applied to lethal force encounters and life threatening events.

The program begins with an introduction to the mindset for seeing traumatic injuries and breaking the tunnel vision so you can treat those injuries. We will cover safety for you and your patients, be that yourself or another person. We will also cover the legality of those concerns.

You will learn to recognize injuries and triage them by severity and treat them without wasting precious time. You will get to see and

use equipment that is cutting edge for trauma care. This class will not only help you but your family also as injuries can occur anytime and anywhere.

Events ranging from the Boston Marathon Bombing to a child being mauled by a dog would not be resolved with a gun, but lives could be saved with this type of training.

Being "prepared" in today's world means more than learning to use a gun, and this is the type of training that will give you the well-rounded knowledge to be truly prepared for a lethal event.

Course Requirements/Equipment.

There will be no formal lunch break in this class. There will be an opportunity to eat and drink during the portions of the class where videos are being played.

There are no formal equipment requirements for this class.

Students are encouraged to bring the following:

A pen and notebook for notetaking.

A pillow or cushion to make

sitting at a desk more comfortable for several hours.

There will be no firearms handling of any kind in this class, therefore, if you arrive to class legally armed, please do not touch or handle your firearm during the class.

Threat anatomy will be providing all of the equipment for this class, and students will be given an opportunity to purchase individual trauma kits at the end of class.

"Frank is one of the finest firearms instructors that I have ever met.

He has studied with some of the leading firearms instructors in the nation and his Threat Anatomy program is providing the state of the art cutting edge theory and application of defensive firearms use.

Anyone, from beginners to advanced practitioners can benefit from spending time with Frank, and if you want to take your knowledge and application of defensive tactics to the next level, you owe it to yourself to follow the lead of law enforcement agencies that have sought out Frank's unique perspective."
